Zoetra

User Guide

Your AI assistant for Windows. Everything you need to set her up, make your first video and find every command, in one place.

Version 0.1.98 | October 2026

Keep this guide handy, or print the command pages.

What's inside

1. Setting up
Download, install, unlock and add your keys

2. Talking to Zoetra
The Talk button, the chime, the wake word and her two modes

3. Your first video
From script to finished video, step by step

4. Every command
Grouped by what you want to do

5. If something goes wrong
Quick fixes for the common snags

6. Help and your account
Support, updates, new computers and cancelling

Good to know
Zoetra can be renamed. If you've given her another name, use that name wherever this guide says Zoetra, including "Hey Zoetra" for the wake word.

1. Setting up

You'll need a Windows 10 or 11 computer, an internet connection and the email address you bought Zoetra with. It takes about 15 minutes.

Download and install

1. Download Zoetra: ZoetraSetup.exe (about 200MB). If your browser asks, choose **Keep**.
2. Open your Downloads folder and double-click **ZoetraSetup.exe**.
3. If a blue box says **"Windows protected your PC"**, click **More info**, then **Run anyway**. Windows shows this for apps from small, new companies. It isn't a virus warning.
4. Click **Next** through the installer, then **Finish**.

Unlock and set up

1. Type the **same email address you paid with** and click Unlock. There's no code to remember.
2. Answer her quick questions: your name, what your videos are about, and what she should be called.
3. Add your two free keys. **Groq** is her brain and ears, and **Serper** is her web search and trends. Paste each key into its box and click **Test**. Keys are stored safely in Windows Credential Manager.
4. Optional: add **HeyGen** for avatar videos, **ElevenLabs** for premium voiceovers and **YouTube** for extra trend data. You can skip these for now, as she has a free built-in voice.

> **Tip**
> Next time, just double-click the **Talk to Zoetra** icon on your desktop. Change any of your answers or keys later by saying **"Change my settings"**.

Your data stays yours

Your settings, memory, notes and finished files stay on your own computer. Zoetra doesn't collect, sell or share them, and nothing you tell her is used to train AI. When she needs to think, your words go to Groq for the answer, and Groq's rules say it can't train on them or keep them by default.

2. Talking to Zoetra

You can speak to her or type, whichever suits you. Everything in this guide works both ways.

Speaking

1. Click **Talk** and wait for the soft chime.
2. Speak normally. When you stop, she answers, then listens again by herself.
3. Stay quiet, or say **"Stop listening"**, and the microphone switches off.

The wake word (hands-free)

Click Talk and say **"Turn on the wake word"**. From then on, say **"Hey Zoetra"** (or "Hi", "Hiya" or "Hello Zoetra") and just talk. It's heard on your computer only. **"Turn off the wake word"** stops it.

Chat mode and work mode

Zoetra starts in **chat mode**, so she only starts a job when you clearly ask for one, such as "can you..." or "make...". Say **"Let's work"** and she'll pick up jobs from anything you say. Say **"I'm just chatting"** to go back.

Answering her questions

When she asks you something, you can answer by voice: "yes", "go ahead", "no", "the second one", "save it" or "make it shorter".

Tip
Need a moment to think? Say **"Stand by"**, **"Hold on a sec"** or **"Bear with me"** and she'll wait until you're ready.

Her laugh
Say **"Turn your laughs on"** and she'll really laugh out loud when something's funny, but never when you're talking about something sad or serious. **"Laughs off"** turns them off. They start off.

3. Your first video

Zoetra writes your script, films it with your HeyGen avatar, adds captions and makes your thumbnails. You'll need a HeyGen key for avatar videos. Without one, she can send scripts to InVideo instead.

Write the script together

1. Say **"Help me write a script about** [your idea]**"**. The script builder opens.
2. Talk it through. Nothing goes into the script until you say **"Keep that"** or **"Lock it in"**.
3. Fix lines as you go: **"Take that out"**, **"Change** ... **to** ...**"**, or **"Next part"** to move on.
4. Say **"Read it back"** to hear the whole script, then **"That's the script done"**.

> **Tip**
> Already have a script? Paste it in and ask her to polish it. She'll save her version for you, and you can keep tweaking it before you film.

Film it

1. Say **"Make the video"**, **"Film it"** or **"Make a HeyGen video of the script"**.
2. She asks where the finished video should go: CapCut, Canva or just the folder. Nothing is spent until you've answered.
3. When it's ready, say **"Play it"** or **"Open the folder"**.

> **Filming a saved script**
> Want an older script? Say **"Show my scripts"**, then **"Film script two"** (or whichever number you want). The newest is always number one.

Let her do it all

Say **"Search the latest trends and make me 2 videos"**. She finds what's trending, writes the scripts, films them, adds captions and makes thumbnails, then hands them to CapCut or Canva if you want to finish them there.

4. Every command

These are examples. You don't have to say them word for word. Put your own details in place of anything in [square brackets].

Videos

Say or type	What happens
Make the video / Film it	Films the script you've just written
Make a HeyGen video of the script	The same, by name
Make a video of [avatar] saying ...	Films your exact words, nothing added
[Avatar] video about [your topic]	Writes the script first, then films it
Search the latest trends and make me 2 videos	Trends, scripts, filming, captions and thumbnails
List my HeyGen avatars	Shows the avatars on your HeyGen account
Make thumbnails for my latest video	YouTube 16:9 plus a TikTok and Reels cover

Script builder

Say or type	What happens
Help me write a script about ...	Opens the script builder
Keep that / Lock it in	Puts the line into the script
Take that out / Scratch that	Removes it
Change ... to ...	Swaps the words
Next part / Change the hook / Redo the outro	Moves on, or reworks one part
Help me	Ideas for the part you're on
Read it back	Reads the whole script
That's the script done	Finishes and saves it

Saved scripts and letters

Say or type	What happens
Show my scripts	Lists them, newest first
Read script two / Film script two / Delete script three	Works on one by its number
Film the [name] script	Picks a saved script by its name
Save this letter as Letter to my boss	Saves it by name. Then say "Open it"

Voiceovers

Say or type	What happens
Make a voiceover of the script	Free built-in voice, or ElevenLabs if you've picked it
Voiceover saying welcome to my channel	A voiceover of your exact words
ElevenLabs voiceover of the script	Uses your ElevenLabs voice
Premium voiceover of the script	ElevenLabs best quality, double credits
List my ElevenLabs voices	Shows your voices

Editing videos (free, on your computer)

Say or type	What happens
Show my videos	Lists your videos
Make short clips from my last video	Cuts it into shorts
Cut video two into 15 second clips	Clips of the length you choose
Remove the pauses from my last video	Tightens it up
Trim the first 2 seconds	Trims the start
Open it / Play it / Open the folder	Opens what she just made

Your original video is always kept.

Other apps

Say or type	What happens
Open CapCut / CapCut import my latest video	Opens CapCut and brings your video in
CapCut split / CapCut play / CapCut undo twice / CapCut export	Controls CapCut for you
Open Canva for a TikTok cover / Open Canva with the script	Opens Canva ready to go
Open InVideo about [topic] / Send the script to InVideo	Uses InVideo instead of HeyGen
Log in to my accounts	First-time sign-in for Canva, InVideo, HeyGen and ElevenLabs

Blog posts and WordPress

Say or type	What happens
Write a blog post about …	Comes with three titles, a meta description, tags and social teasers
Make a blog post from my [file name] file	Writes one from your own file
Show my blog posts / Read blog post two / Open blog post two	Works with your saved posts
Connect my WordPress / Disconnect my WordPress	Links your own site
Upload blog post one to WordPress	Saves a draft only you can see
Publish blog post one	Asks first, then it's live

Your files

Say or type	What happens
Find my files containing [word]	Searches the folders you've allowed
Find me content	Finds useful material in your files
Summarise my [file name] / Proofread my [file name]	Works on a file by name
What does my [file name] say about …?	Answers from the file
Remember the key points from my [file name]	Adds them to her memory
Learn my writing style from my [file name]	Writes like you from then on
What do you remember from my files? / Forget [file name]	Checks or clears what she learned
Search for …	She asks: online, or your computer?

You can also click **Upload File** to choose a TXT, Word or PDF file, then pick what to do with it, including "Film this script".

Memory

Say or type	What happens
Remember that …	Saves a fact about you
Correct that: … / Forget that	Fixes or removes it
Commit to memory: …	Keeps it for good, in your important-memory file
Open my commit to memory file	Opens that file so you can check it
What's in my commit to memory file?	Lists it on screen

Say or type	What happens
Take [thing] out of my commit to memory file	Removes one item
What do you remember? / Forget what you remember about ...	Checks or clears her memory
Save this idea: ... / What ideas have I saved?	Your ideas list
Pick up where we left off / Where were we?	Carries on from last time
Turn on automatic memory / Clear our chat history	Memory settings

Voice and microphone

Say or type	What happens
Stand by / Hold on a sec / Bear with me	She waits until you're ready
Repeat that / Carry on	Says it again, or carries on after an interruption
Stop listening	Switches the microphone off
Chime on / Chime off	The soft chime before she listens
Check my microphone / Help me set up my microphone	Fixes mishearing
Turn on the wake word / Turn off the wake word	Hands-free "Hey Zoetra"
Turn your laughs on / Laughs off	Her real laugh, off to start with

Reminders and notes

Say or type	What happens
Remind me in 20 minutes to ...	A reminder on your computer
Remind me about my dentist appointment on Friday at 2pm	Reminds you the day before and on the day
What are my reminders? / Cancel reminder two	Checks or cancels them
Take a note: ... / Read my notes / Delete my last note	Quick notes with a short summary

Reminders go off while Zoetra is open.

Phone and Telegram

Say or type	What happens
Start my phone app / Connect my phone	Shows a QR code to scan with your phone
Send me the link	Sends the phone app link to your Telegram
Connect Telegram	One-time, about 2 minutes
Send that video to my phone / Send video two to my phone	Sends it to Telegram
I've lost my phone / Reset my phone app	New link, and the old phone is locked out
Stop the phone app / Disconnect my phone	Turns the phone app off

Your phone works while your computer is on and Zoetra is open.

Brands and modes

Say or type	What happens
Add a brand called [name]	Each brand keeps its own chat, notes, ideas and style
Switch to [brand] / Which brand am I on? / Switch to general	Moves between them
Remove the [name] brand	Deletes a brand
Let's work / I'm just chatting / What are my modes?	Work mode or chat mode

Settings, backup and your licence

Say or type	What happens
Change my settings	Name, keys, avatar, products and sign-off
Change your name to [name]	Renames her
Save my setup / Load my setup	Moves everything to a new computer
Set my backup password / Change my backup password	Locks your weekly backup
Show my backup password	Shows it and your recovery code, on screen only
Email me my backup	Sends you a copy
Remove this computer	Takes Zoetra off this computer
How much Groq have I used today?	Today's free thinking time
Status	What's running in the background

Dev Mode (build your own mini tools)

Say or type	What happens
Dev mode	Turns Dev Mode on
Build a tool called hook generator that ...	Writes, tests and fixes it until it works
Run hook generator [topic]	Uses your tool
Fix hook generator [what to change]	Improves it, keeping every version
Webapp hook generator	One web page you can sell or give away
Tutorial hook generator / Package hook generator	A guide and TikTok script, or a zip of everything
List / Exit	Your tools, or leave Dev Mode

Help

Say or type	What happens
What can you do? / Help	Shows her commands on screen
Read me the list	Reads all her commands out loud

5. If something goes wrong

She keeps mishearing me

Say **"Help me set up my microphone"**. She'll offer this herself if she keeps getting it wrong.

She said she ignored her own voice

Her microphone picked up her speakers. Wait for the chime before you speak, or turn your speakers down a little.

She won't start my video

Say **"Show my scripts"**, then **"Film script one"**. That always films the newest saved script. Check your HeyGen key under "Change my settings" too.

She asked "Online or from your files?"

She thinks you want a search. Say **"Online"**, **"Files"** or **"Cancel"**.

A noise or cough stopped her

Say **"Carry on"**.

She's started a job I didn't want

Say **"I'm just chatting"** to go back to chat mode.

My phone app stopped working

Check your computer's on and Zoetra's open. If that doesn't fix it, say **"Reset my phone app"** and scan the new QR code.

She says my licence isn't found

Use the exact email you paid with. If you've moved computers, choose **Move Zoetra here**. You can do this up to 3 times a month.

6. Help and your account

Getting updates

Updates aren't automatic yet. To get the newest version, download it again from the same download link and install it over the top. Your settings, memory and files are kept.

New computer

Your licence covers one computer plus your phone. On the old computer, say **"Save my setup"**. Install Zoetra on the new one, unlock it with your purchase email, choose **Move Zoetra here**, then say **"Load my setup"**.

Backups

Zoetra keeps a weekly backup in your **Documents\Zoetra Setup** folder, locked with a password only you know. For extra safety, you can copy it to Google Drive, Dropbox, OneDrive, a USB stick or an email to yourself.

Need a hand?

Email support@heyzoetra.com from the email you bought with, and we'll help. You can also ask Zoetra herself: say **"Help"**.

Cancelling

Email support@heyzoetra.com from your purchase email. You keep access until the end of the month you've paid for, and everything you've made stays on your computer.

Online guide
The setup steps are also online at heyzoetra.com/start.
